

FARMERS' INSTITUTE.

The Ohio County Farmers to Meet Again at Elm Grove.

RESOLUTIONS RECENTLY PASSED

At the Institute at West Liberty They Favor an Extension of the Experimental Station Idea, and Liberal Appropriations—The Programme Next Week.

At the Farmers' Institute at West Liberty, January 18, the following resolutions were passed by a unanimous vote:

Resolved, First—That we have heard with interest the addresses, essays and discussions at the Farmers' Institute at West Liberty, and that we express to the staff of the West Virginia agricultural experimental station our hearty approval of the work they have done and are doing for the benefit of agriculture in this state.

Second—That we believe the interests of agriculture would be greatly promoted if the state would provide a liberal appropriation for the purchase and equipment of a suitable farm for carrying on practical experiments upon all branches of agriculture, especially for the study of problems connected with sheep husbandry and live stock, which is impossible at present, even when the station is offered the stock free of charge.

Third—That we would view with favor any legislation that would permit the removal of the experimental station from its present location to our midst.

The Farmers' Institute that was held at West Liberty on the 17th and 18th of January, 1895, was by far the most successful institute that has ever been held in the county. The papers, addresses and discussions were excellent, instructive and entertaining. So successful was the institute that the committee in charge was much encouraged, and determined to carry out the idea of holding a second institute at Elm Grove in order to give those persons who could not avail themselves of the opportunity of attending at West Liberty an opportunity to attend a meeting of a similar kind close to home. Among the large crowds that assembled at West Liberty was noticed some of the most prominent farmers and stock breeders of Brooke county, Washington county, Pa., and Belmont county, Ohio.

All of these persons spoke in the highest terms of the institute and expressed themselves as well pleased with their trip. Following is the programme that will be carried out in Kimmons hall, Elm Grove, Thursday and Friday, February 14 and 15:

"HOME SALOON."

A New Institution Being Tried in Chicago To Abate the Liquor Evil.

CHICAGO, Feb. 5.—The first of the so-called "home saloons" was opened last night at 63 West Adams street. John A. Nichol and several ladies acted as assistants to the bar keeper and one pretty miss played the piano while the temperance toppers drank. Several clergymen dropped in during the evening, took their drinks, sampled the free lunch and went out. Francis E. Willard beamed down on them from the wall behind the bar, probably the first time her lithograph has been used in a saloon.

Mr. F. P. Zolt, the chemist employed by the Home Saloon Association to invent harmless drinks, was on hand with several new samples.

With five cent drinks soup and sandwiches are served. With ten cent drinks a meal is given. Papers and magazines are strewn about, and there are several checkers and chess boards in this model saloon. Later there will be a roof garden.

MOTOR ACCIDENT.

Two Cars on the Kansas City Elevated Collide in Mid Air.

KANSAS CITY, Mo., Feb. 5.—Two heavy trolley cars collided high up in the air on the elevated railway structure in Kansas City, Kansas, to-day. They were going at full speed on the north track and while the force of the collision was so great that the front platforms were demolished and the west-bound car shoved back off its trucks, neither car went off the structure. Forty passengers were aboard the two cars. Singularly enough there was no loss of life and the only serious injury was to the two motormen.

The list of the injured follows: James Jackson, motorman, left foot smashed; Albert McNamora, motorman, nose broken and face cut; L. B. Greene, left leg lacerated; Patrick McTrevor, cut with glass. Several others were slightly injured.

Meeting of Coal Operators.

PITTSBURGH, Feb. 5.—A meeting of the coal operators of this district will be held in this city Thursday to discuss trade conditions and to take some action toward a uniform mining rate for the district. At present every operator who is working his mines is paying a different rate, which has resulted in a demoralization of the trade. Operators from Buffalo, Erie and Cleveland are expected in attendance.

A DES MOINES woman who has been troubled with frequent colds, concluded to try an old remedy in a new way, and accordingly took a tablespoonful (four times the usual dose) of Chamberlain's Cough Remedy just before going to bed. The next morning she found that her cold had almost entirely disappeared. During the day she took a few doses of the remedy (one teaspoonful at a time) and at night again took a tablespoonful before going to bed, and on the following morning awoke free from all symptoms of the cold. Since then she has, on several occasions, used this remedy in like manner, with the same good results, and is much elated over her discovery of so quick a way of curing a cold. For sale by Chas. H. Goetz, Will W. Irwin, John Klari, Wm. E. Williams, C. Monkemoller, Wm. H. Haque, H. C. Stewart, A. E. Schenck, J. Coleman, C. Schnepp, Wm. Monkemoller, Wheeling, W. Va.; Bowie & Co., Bridgeport; B. TOO LOW WAGES.

Other Reasons Why We Get Discouraged.

Labor's tiresome sameness wears Brain and Body.

Depressed System is Often Badly Nourished.

Paine's Celery Compound a Perfect Remedy.

Better Even Than Rest and Change for the Weary.

The more minutely all kinds of work become subdivided, the more sameness and monotony creep into each man's labor.

Day after day, day after day, in the same rut till little interest remains in the work, and the mind and body are gradually robbed of energy and healthy elasticity. Unless something is done the prolonged strain is likely to result in health failure; nervous symptoms appear, cares that were once lightly cast off now stick like burrs, slight physical exertion tires, and the end is complete prostration and breaking down of some vital organ.

Business men feel this, public officials, wage-earners, housekeepers, every man and woman whose work allows of little or no rest and change.

At the first small beginnings of nervousness or when lamprid feelings do not disappear after a sound night's sleep, the prudent person should know that he or she must check this decline in health by the use of that one genuine nerve food and blood renewer, Paine's celery compound.

The family physician knows its power over diseases of exhaustion and debility when he orders it, as so many careful practitioners are now doing in every city and small town throughout the United States.

As soon as one has fairly begun to use Paine's celery compound, every day will be a firm step toward assured health. Nervous, unhappy, and feeble persons find their flesh becomes more solid, a more healthy color takes the place of the waxy, pallid look, and there comes a clear increase in the volume of the blood and an increased normal appetite because of this rapid feeding of the entire system. Work becomes easier.

This searching tonic goes at once to the very causes of nervous disorder and breakdown. It is invaluable in all wasting diseases, in all cases where unusual demands are made on the system. Especially is it true in the case of mothers and invalids recovering from sickness.

Paine's celery compound has saved thousands from morbidly of feebleness, from the weariness of pain and from bodily weakness. It means health and happiness.

NOTES ON NAVIGATION.

Stage of Water and Movements of Boats.

The River Interests.

The ferryboat Climax is laid up under the Union bridge on account of the ice.

The receipts at the Pittsburgh wharf during the past year amounted to \$50,000, more than any year since 1874.

The river remains about on a standstill, with about five feet in the channel. The ice was passing slowly yesterday and the fears of a closed river were expressed by nearly all rivermen. A gorge has formed between the channel pier of the steel bridge and the island shore, which sends the floating ice in a straight line for the wharfbot, which is often struck.

President James A. Henderson, of the Pittsburgh and Cincinnati Packet Company, was in the city yesterday, says the Cincinnati Commercial-Gazette, and with Com. G. W. C. Johnston, the secretary and treasurer of the company, held a consultation with Superintendent Elison with a view of deciding on the matter of building a new boat to take the place of the Scotia. Nothing definite was decided upon and the matter was postponed until next week, when the gentlemen will meet again and some final action will be taken.
